# Instructions for authors

Mathematische  
Zeitschrift

Authors are requested to read the following instructions carefully before preparing their manuscripts.

## A. General

Manuscripts should be submitted **in duplicate**:

- (i) either to the Editor who, in the opinion of the author, is most closely concerned with the subject matter of the paper (this should be the rule);
- (ii) or to the Managing Editor.

Papers submitted for publication should preferably be written in **English**. An abstract for *Zentralblatt für Mathematik* (including key words for classification) should be attached.

In order to reduce mailing costs, rejected manuscripts will not normally be returned.

To facilitate communication between authors, editors and publisher, the author should furnish a fax number and/or e-mail address on the title page of the manuscript.

Manuscripts (**in duplicate**) must be in their final form and typed on one side of the paper only, in double spacing with wide margins. The author should also keep a copy of the manuscript.

Normally only typesetting errors should be corrected in the page proofs. A **charge** is made for **extensive changes** introduced after the paper has been typeset.

Formulae should be typed whenever possible. Copies produced by a matrix printer are not accepted unless clearly legible.

**Illustrations** and diagrams should be submitted on separate sheets and not included in the text. They should be good-quality and drawn in India ink using clean, uniform lines. Computer-drawn figures are acceptable, provided they are of comparable quality. Lines and curves must be smooth. Lettering 2 mm high is recommended. The publisher reserves the right to reduce or enlarge illustrations and diagrams. The author should indicate in the margin of the manuscript where illustrations and diagrams are to be inserted.

**Footnotes** should be numbered consecutively and placed at the foot of the page on which they occur (not at the end of the paper).

On the first page of the manuscript a short **running title** should be provided (not exceeding 70 characters, including spaces).

The **list of references** at the end of the paper should **always** be in alphabetical order and include the **names** and **initials** of **all** authors and the **years** of publication (see examples below). Titles of journals and

book series should be abbreviated in accordance with *Zentralblatt für Mathematik*. Whenever possible, please update all references to papers accepted for publication, preprints or technical reports, giving the exact name of the journal, as well as the volume, first and last page numbers and year, if the article has already been published or accepted for publication.

**Citations in the text** should be either (a) by numbers in square brackets, e.g. [1], or Freed and Melrose [1], referring to an alphabetically ordered and numbered list; or (b) by the author's initials in square brackets, e.g. [F–M] or (c) by author and year in parentheses, e.g. Freed and Melrose (1992). Any one of these styles is acceptable if used *consistently* throughout the paper. In the third system, if there are two authors, both should be named, e.g., Conway and Sloane (1988); if a work with more than two authors is cited, only the first author's name plus "et al." need be given: e.g., Komor et al. (1979); if there is more than one reference by the same author or team of authors in the same year, then a, b, c, etc. should be added after the year both in the text and in the list of references.

In the **list of references**, the following examples should be observed:

### *Journal article:*

1. **or** [F–M] Freed, D.S., Melrose, R.B.: A mod  $k$  index theorem. *Invent. Math.* **107**, 283–299 (1992)

### *Complete book:*

2. **or** [C–S] Conway, J.H., Sloane, N.J.: Sphere packings, lattices, and groups (Grundlehren Math. Wiss. Bd. 290) Berlin Heidelberg New York: Springer 1988

### *Single contribution in a book:*

3. **or** [S] Sjöstrand, J.: Microlocal analysis for the periodic magnetic Schrödinger equations and related questions. In: J.M. Bony et al.: *Microlocal analysis and applications*, Montecatini Terme 1989 (Lect. Notes Math., vol. 1495, pp. 237–332) Berlin Heidelberg New York: Springer 1991

Fifty (50) **offprints** of each paper will be supplied free of charge. Additional offprints may be ordered at cost price when the page proofs are returned.

## B. Marking-up the manuscript

### 1. Text

The words “Theorem”, “Lemma”, “Corollary”, “Proposition”, “Definition” etc. are normally printed in **boldface**, followed by the formulation in *italics* (or, if italic type is not available, underlined with a single straight line) and with the end clearly indicated. The concept of the definition should be in boldface. The words “Proof”, “Remark”, “Example”, “Note”, etc. are printed in *italics* with the formulation in ordinary (roman) body type. If any portions of text in the manuscript are underlined and are intended to be printed with this underlining, a remark explaining this must be attached.

### 2. Formulae

Letters in *formulae* are printed in *italics* and figures in roman if not marked otherwise. In doubtful cases it will help the printer if the position of indices and exponents is marked thus:  $h^{\hat{p}}, a^{\hat{\psi}}$ . Spacing of indices and exponents must be specially indicated ( $A_{m\ n}^{n\ m}$ ) otherwise they will be set ( $A_{mn}^{mn}$ ).

The following are frequently confused and should be made unambiguous:

$\cup, U, \bigcup, U; \circ, o, O, 0; \times, x, X, \chi, \kappa; \vee, v, V;$   
 $\theta, \Theta, \phi, \varphi, \Phi, \emptyset, \emptyset; \psi, \Psi; \varepsilon, \epsilon;$

$\acute{a}, \alpha'$ ; the symbol  $a$  and the indefinite article  $a$ ;  
also the handwritten letters:

$c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V;$   
 $w, W; x, X; z, Z;$

Please take care to distinguish these capital letters by double underlining.

### C. Papers prepared with T<sub>E</sub>X

Authors who prepare their papers with T<sub>E</sub>X are encouraged to ask for Springer-Verlag's T<sub>E</sub>X macro packages, called P<sub>J</sub>our1g (plain-T<sub>E</sub>X) and L<sub>J</sub>our1 (LaT<sub>E</sub>X), either by letter to Springer-Verlag or by e-mail to svserv@vax.ntp.springer.de – Springer-Verlag's e-mail server address. This message must contain one (several) of the following commands

for P<sub>J</sub>our1g:     get /tex/plain/pjour1g.zip  
for L<sub>J</sub>our1:     get /tex/latex/ljour1.zip

Authors who wish to submit disks to the editor should do so only after the manuscript has been accepted for publication. They must then include any macro definitions they have used together with a printout for reference.

It is important to ensure that the text is identical in the hard copy and in the soft copy. The production time for papers submitted in this form can be reduced considerably.

Authors who have written their papers in T<sub>E</sub>X but have not, for whatever reasons, used Springer-Verlag's macros should likewise send in a disk and corresponding hard copy.

Springer-Verlag will then decide on a case-by-case basis whether it makes sense economically to work from the T<sub>E</sub>X files.

#### Final check:

- Names and complete affiliations of all authors provided on title page?
- Summary enclosed?
- Short running title provided?
- If the paper is not in English, English title and English summary provided?
- Texts and ends of theorems, lemmas, etc., clearly marked?
- All figures enclosed?
- References styled according to the Instructions for authors?

#### T<sub>E</sub>X users:

- Request P<sub>J</sub>our1g or L<sub>J</sub>our1 macro package from: svserv@vax.ntp.springer.de
- Submit disk with corresponding hard copy after acceptance of manuscript
- Make sure disk and hard copy are identical
