## The Institution of Electrical Engineers
## Develops Internet Information Services

London - The Institution of Electrical Engineers (IEE) is developing Internat World-Wide Web and gopher services covering a range of information including Institution news, events, membership, library services and, in particular, details of the IEE Publishing and Information Services. Full details of all publications are included - books, journals, conference publications, distance learning material and INSPEC services. Additional information such as new publications and services, advertising rates, guides to authors and the text of INSPEC Matters is also available, starting with this year's September issue. All of this will be updated regularly and can be accessed on the Internet via either the Web or gopher server.

The servers are still in the pilot phase, and future improvements proposed include links to other relevant Web and gopher servers, such as those of online hosts, and FTP access to demonstration software such as for *Electronics Letters Online* and access to the IEE Library Catalogue. IEE welcomes customer suggestions by e-mail to inspec@iee.org.uk

Those wishing to have a preview of the servers may do so on:

http://www.iee.org.uk/ (for the WWW server)
and:

gopher.iee.org.uk     (for the gopher)
